

Comments from Kleenhanz® Users

“**Kleenhanz**® is so much more than a hand sanitizer! Because it is alcohol free and effective on many forms of bacteria, including staph, we have seen amazing results using the towelette on faces to treat acne. Anyone who has suffered through the stinging, smelly and drying effects of alcohol will love how **Kleenhanz**® makes you feel. We also wipe down all of our patient rooms and equipment, so it is handy as a surface wipe as well.”

– **Lori Suggs, Owner,**
Cosmetic Laser Center, Wichita Falls, TX

“I founded Oklahoma Sports Sciences and Orthopedics in 1995. The **Kleenhanz**® products have been very helpful in treating athletes and patients with knee and shoulder injuries! It is safe and very effective! It also promotes awareness to me and my staff of the importance of cleansing hands between patients! I highly recommend this product!”

– **Dr. Calvin Johnson, M.D., Oklahoma City, OK**

“Over the past several years the incidence of severe bacterial infections has become prevalent in the athletic arena. The strength & conditioning environment is one where this problem can become epidemic, **Kleenhanz**® offers my staff and players an easy and efficient way to combat this problem and has become part of our daily routine.”

– **Joe Juraszek, Strength and Conditioning Coach**
of the Dallas Cowboys

“I have used **Kleenhanz**® in my office for over 18 months now where my nurse and I use it all the time. We love the fact that **Kleenhanz**® works so well without drying out our hands, especially in the winter months. I have also recommended **Kleenhanz**® to patients with Eczema and suggested that instead of scratching, they rub it on itchy skin areas. **Kleenhanz**® does not burn or sting and the mild detergents can be effective on the skin irritation. A father of one of my patients suggested this after seeing it work on his son.”

– **Dr. Victor Estrada, M.D., San Antonio, TX**
